

Fast, accurate, reliable

Even under pressure

Advanced, high speed checkweighing is the most effective way of ensuring conformance to stringent weights and measures legislation. Our checkweighers can check the weight of virtually any product including soup, meat, fish, poultry, cheese, fruit and vegetables, to name but a few. They work easily, quickly and, of course, very reliably in the harshest of environments – even those in excess of IP66 – to very high levels of accuracy.

Don't wait, call Dave Evans now on +44 (0)1255 241000 or go to www.aewdelford.com/checkweighing to get more information.
