

# Loads more output

# Loads less cost

Our amazing Intelligent Portion Loading Robot (IPL Robot) picks up single or multiple portions of fresh or frozen meat, fish, poultry, cooked meats, bacon or cheese – in fact, almost anything – and places them quickly, gently and accurately, in any format, into trays or a thermoformer. A single vision and control system can handle up to six robots, each of which can perform various loading tasks and certain grading options.

**Get loads more output at loads less cost – call Tony Ambrose now on +44 (0)1603 700755 or go to [www.aewdelford.com/iplrobot](http://www.aewdelford.com/iplrobot).**

**And get loads of amazing information.**
