

Weigh, price, label

At speeds that will amaze you

We think our weigh price labellers are the fastest in the world. They run at speeds of up to 160 packs/min for long periods so they're ideal for meat, cheese and other products that must be wrapped, weighed and labelled quickly and accurately. They regulate their own speed and orient packs precisely for perfect label positioning and printing by long life, ultra high quality print heads. Weighing, pricing and labelling have never been so good – or so fast.

Quick, call Dave Evans now on +44 (0)1255 241000 or go to www.aewdelford.com for details of our range.
