Features and Benefits

- Converts rectangular portions to 3 dimensional 'natural' shapes.
- Shapes portions directly from frozen raw material.
- Produces one, two or three portions per machine cycle for optimum production.
- Quick release product form tooling.
- Portions with cavities, for sauces or fillings, can be produced.
- High capacity – up to 500kg per hour.
- Ten product programme memories allow quick product changeover.
- Fast and easy cleaning with quick release product tooling and open construction.
- Robust stainless steel and food grade plastic construction.
- Comprehensive and quick fault diagnosis.
- Lower cost, two part tooling.
- Nugget portions are also an option.

AEW Delford Systems **ShapeLine Compact** is the latest addition to the ShapeLine portion shaping range. This magazine loaded, high capacity shaping machine produces portions of the required shape and texture, in 3 dimensions, from the frozen state.

This 'state-of-the-art,' precision built machine has been developed specifically for processors who need to respond to the growing demand for portion controlled fish, or poultry products, with natural appearance and texture.

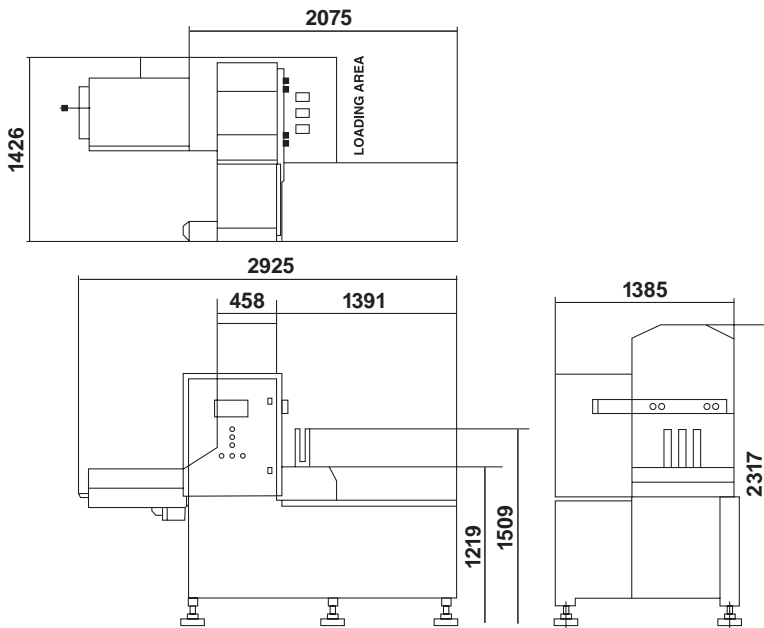

ShapeLine Compact works with frozen natural fillet or whole muscle product without the need for thawing, grinding or further processing. Accurate portion control, high yields, excellent presentation and fast, efficient production are all vital to profitability and this is where **ShapeLine Compact** makes a significant contribution.

ShapeLine Compact can produce one, two or three shaped portions per machine cycle. Portions with different shapes can be produced to give pack variety and cavity portions for sauces or fillings can also be shaped. Nuggets are also an option.
