

Delford SmartSleeve CT60 Automatic Sleeving System

Features and Benefits

- Compact mobile unit.
- Ideal entry level system up to 60 trays/min.
- Flexible infeed for manual or automatic loading.
- Easy adjustment and operation with minimal training.
- Integral checkweigh and printing options.
- Quick and easy size changeovers (typically 5 minutes).
- Robust stainless steel construction.
- Removable conveyors for wash down.
- PLC-controlled servo driven.
- Touch screen operator panel.

The AEW Delford Systems **SmartSleeve CT60** is the ideal solution for automating your tray sleeving operation. It can be fed by hand or from an inline conveyor system and copes with a wide variety of tray and sleeve sizes and shapes.

Designed to run at speeds up to 60 packs/min, the **SmartSleeve CT60** can reliably sleeve trays much faster than a manual operator can, and with much greater accuracy and consistency.

The **SmartSleeve CT60** is designed to allow rapid changeover between different products by holding up to 600 pre-cut blank sleeves in a magazine. So to change between products, simply remove the existing magazine, fit the next one and adjust the guides. Typically, this changeover takes less than five minutes. The machine is also fitted with castors, allowing easy movement between production lines when required.

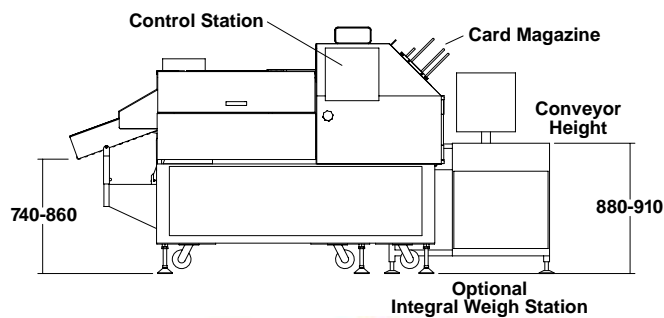

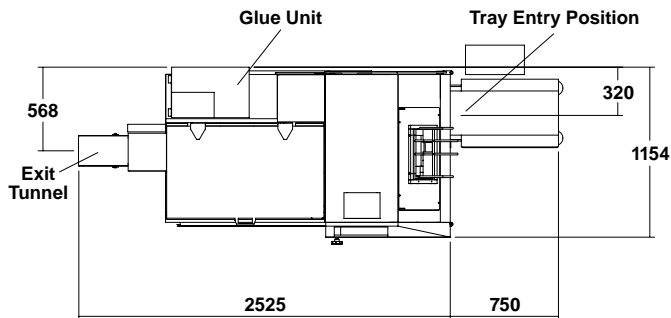

The **SmartSleeve CT60** has a wide range of optional features, including thermal transfer printing directly onto the sleeve. Also available as an option is an integral weighing system. Coupled with the thermal transfer printer, this allows checkweighing and random weighing operation, ensuring that no out of range packs are printed.

Combining the weighing, printing and sleeving into a single machine is significantly cheaper to own and more compact than a number of separate systems.

Technical Information

Dimensions

Line height: 900mm +/-50mm

Weight: 1000kg

Tray Specification			
(mm)	height	width	length
Minimum	30	105	110
Maximum	80	180	250

Services

Power: 208V 3 phase only or 415V 3 phase
+ neutral, 50/60Hz

Clean, dry air @ 275 l/min @ 6 bar

Optional features

Menu-driven size adjustment

Conveying extensions

Printing for variable product specific information

Fully integrated fixed or random weighing unit

Fully integrated label application

All AEW Delford Systems machines carry CE certification.

Integrated Systems

The **SmartSleeve CT60 Automatic Sleeving System** can operate as a stand alone machine or it can be integrated with a range of manual or automatic production lines.
