## Key Features and Benefits

- Operates at speeds up to 150 labels/min
- Freestanding or conveyor mounted
- Easy operation and label loading

## Options

- Low label reel detection
- Lockable casters for portability

# LS40 Label Applicator

The AEW Delford Systems **LS40 Label Applicator** is specifically designed for the application of promotional and product description labels on a wide variety of packs for food and non-food applications.

Its competitive price, flexibility, speed and ease of operation make it an ideal entry level machine for processors or companies with low to medium production volumes.

The machine can apply self-adhesive labels at speeds up to 150 labels/min. depending on issue length.

The **LS40** can be supplied in a variety of formats:

- Complete on a stand with integral conveyor.
- Complete on a stand without conveyor for positioning above an existing conveyor.
- Applicator head only, for mounting on an existing conveyor.
- Lockable wheels can be fitted as an option to provide full portability.
