

WPL8500 Weigh Price Labeller

WPL 8500 Weigh Price Labeller for heavy products.

Features and Benefits

- Modular Construction
- Optional infeed/outfeed conveyor
- Fully network able
- Flexible label positioning

Options

For front and side application of label
weigh unit only

- EAN13, 8 and 128 Flexi

WPL8500 – Weigh Price Labeller

The AEW Delford WPL8500 heavy product weigher is capable of operating as a weigh labeller for crates and boxes or as a weigh price labeller for retail products.

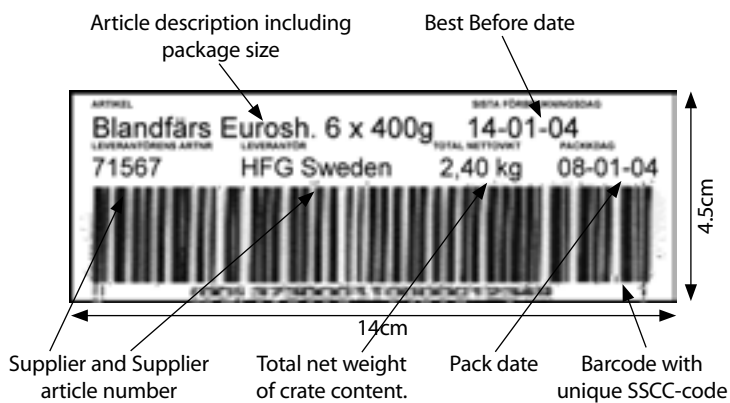

When applying labels to a crate or box an optional attachment to secure a label to the front and side can be supplied.

Where a weigh unit is required to fit into an existing line then the unit can be offered without the infeed and outfeed, thereby utilising the end users own conveyor.

When using a standard Eurocrate, speeds of up to 36 crates per minute can be achieved.

For wrapped bulk products the system can operate only as a weigh unit or, with the inclusion of a labelling head, it also apply labels with fully printed variable information.

Typical Crate Label

Subject to change without notice / WPL8500/KLGD07.07

Technical Information

Power requirements:

110/230V ± 10%
50–60Hz 1 phase

Compressed air: 100l/min 6 bar

Weighing:

Continuous flow dynamic weighing system
Standard Weight Ranges

- 100g to 10000g by 5g
- 10000g to 20000g by 10g
- 200g to 27500g by 10g
- Additional weight ranges on request up to 40kg
- Automatic zero tracking

Maximum label size:

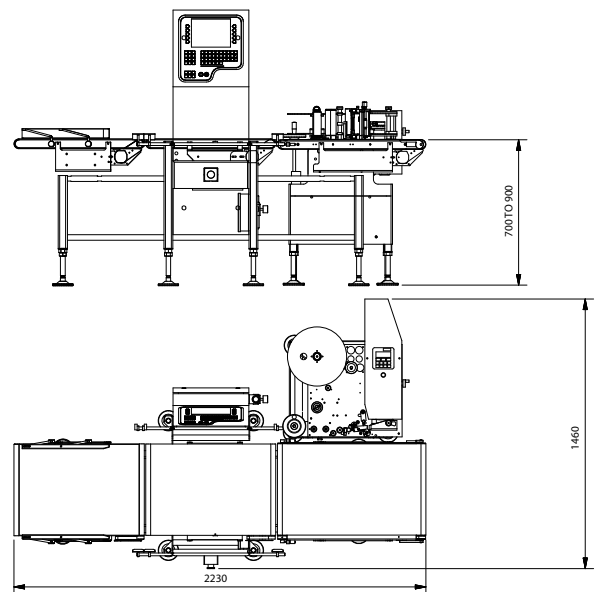

110mm wide by 150mm long
Larger label may be possible, subject to design

Speed:

36 crates/min

Pack Presentation:

	length	width	height
Minimum	200mm	100mm	50mm
Maximum	600mm	600mm	400mm
